TUTCO SureHeat

Threaded Inline Heaters

Designed for Industrial Process Heating Temperatures up to 1400°F (760°C)

Threaded in-line air heaters are UL Recognized products designed for industrial process heating applications requiring high heat and high air pressure. Serpentine[™] heating elements are installed into a 304 stainless steel housing and threaded at both ends. TUTCO SureHeat threaded in-line heaters offer two styles, Style "A" and Style "B". Style "A" should be used when an absolute leak-proof air system is required. Need a custom solution? We have supplied hundreds of customer-specified variations. Contact us for more information.

Features and Benefits

Style A Threaded In-line

- Max inlet temperatures 900°F (482°C)
- UL Recognized
- High-pressure power feed throughs
- Leak-proof to 150 psi (10 bar)

Style B Threaded In-line

- Max inlet temperatures 200°F (93°C)
- UL Recognized
- 12" (305mm) flexible wire power leads
- Not recommended for leak-proof systems due to slight leakage through wire strands

Product Specifications

Maximum Inlet Air Pressure 150 PSI (10 BAR)

Maximum Inlet Air Temperature 900°F (482°C) Style "A" 200°F (93°C) Style "B"

Maximum Exit Air Temperature 1400°F (760°C)

Minimum Air Flow for Best Control 60 SCFM (28 SLPM)

Performance Curves

Threaded Inline Maximum Performance

Notes:

- Temperatures are measured by 3/16" "K"
- Use of other sensor types and mounting locations can result in heater damage
- Minimum airflow for accurate control is 60 SCFH
- Maximum air temperature is 1400°F (760°C)
- Operating above this curve voids the product warranty

Threaded Inline Heater

Threaded Inline Thermocouple Adapters

Threaded In-Line Thermocouple Adapters					
Part Number	Description				
F077056	TC Adapter 3/8" Threaded In-Line				
F077057	TC Adapter 1/2" Threaded In-Line				
F077058	TC Adapter 1-1/4" Threaded Inline				
F077059	TC Adapter 2-1/2" Threaded In-Line				
F206119	1/8" TC Type K 12"Probe				

Thermocouple Installation Reference

Before permanently installing an in-line heater, set the depth of the TC compression fitting to ensure proper temperature control.

Make sure to properly mount the TC coupling so that the TC is slightly above the ceramic rod running through the center of the Serpentine[™] heating element. The open end of the TC should be in the heated air stream as shown.
