Low Pressure Inline Heaters

High Temperature Performance at Higher Flow and Low Air Pressures

TUTCO SureHeat Inline Electric Duct Heaters provide compact, fast response heating for a multitude of industrial and research applications where gas pressure is ≤ 10 PSI (.7 Bar) and temperatures up to 1475°F (800 °C). TUTCO SureHeat's proprietary Serpentine™ heating elements deliver the industry's highest watt density ensuring a compact installation, low weight, and fast ramp and response time. Factory preassembled with flanged connections and a round, heavy duty duct housing assures a quick, uncomplicated installation. A complete system includes a power supply control panel assuring safe, reliable operations.
